No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. US20020062495A1

GENERAL INCPORMATION:

APPLICANT: Schnidt, Robert R.

APPLICANT: Miller, Philip

TITLE OF INVENTION: NOVEL POLYPEPTIDES AND POLYNUCLEOTIDES

TITLE OF INVENTION: RELATING TO THE '- AND -SUBUNITS OF GLUTAMATE

TITLE OF INVENTION: DEHYDROGENASES AND METHODS OF USE

NUMBER OF SEQUENCES: 26
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length 476;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Indels

Patent No. US20020062495A1

GENERAL INPORMATION:

GENERAL INPORMATION:

APPLICANT: Schmidt, Robert R.

APPLICANT: Miller, Philip

TITLE OF INVENTION: NOVEL POLYPEPTIDES AND POLYNUCLEOTIDES

TITLE OF INVENTION: DEHYPROGENASES AND METHODS OF USE

NUMBER OF SEQUENCES: 26

CORRESPONDENCE ADDRESS:

ADDRESSER: Saliwanchik & Saliwanchik STREET: 2421 N.W. 41st Street, Suite A-1

CITY: Gainesville

STREET: Plorida

COUNTRY: USA

| Patent No. 5985634
| GENERAL INFORMATION:
| APPLICANT: Schmidt, Robert R. APPLICANT: Schmidt, Robert R. APPLICANT: Miller, Philip
| TITLE OF INVENTION: NOVEL POLYPEPTIDES AND POLYNUCLEOTIDES
| TITLE OF INVENTION: BELATING TO THE - AND -SUBGNITS OF GLUTAMATE
| TITLE OF INVENTION: DEHYDROGENASES AND METHODS OF USE
| TITLE OF INVENTION: DEHYDROGENASES AND METHODS OF USE
| CORRESPONDENCE ADDRESS: ALIWANCHIK & Saliwanchik & Sa
                                                                                                                                                                                                                                                                                                                  12 MDATTGDFTALQKAVKQMATKAGTEGLVHGIKNPDVRQLLTEIFMKDPEQQEFMQAVREV

Patent No. 587941
GENERAL INFORMATION:
APPLICANT: Schmidt, Robert R.
TITLE OF INVENTION: NOVEL POLYPEPTIDES AND POLYNUCLEOTIDES
TITLE OF INVENTION: DELYDROGENASES AND METHODS OF USE
TITLE OF INVENTION: DELYDROGENASES AND METHODS OF USE
NUMBER OF SEQUENCES: 26
CORRESPONDENCE ADDRESS:
ADDRESSEE: Sallwanchik & Saliwanchik
STATE: 2421 N.W. 41st Street, Suite A-1
CITY: Gainesville
STATE: Florida

Patent No. 5985634
GENERAL INVENTATION
APPLICANT: Schmidt, Robert R.
APPLICANT: Miller, Philip
TITLE OF INVENTION: NOVEL POLYPEPTIDES AND POLYNUCLEOTIDES
TITLE OF INVENTION: RELATING TO THE - AND -SUBUNITS OF GLUTAMATE
TITLE OF INVENTION: DELYDROGENASES AND METHODS OF USE
NUMBER OF SEQUENCES: 26
CORRESPONDENCE ADDRESS:
ADDRESSEE: Saliwanchik & Saliwanchik
STREET: 2421 N.W. 418t Street, Suite A-1
                                                                                                                                                                                                                                                                                                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                          Length 512;
                                                                                                                                                                                                                                                                                                                                                                                                        0, Indels

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ò
                                                                                                                                                                                                                                                Sequence 20646, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: ARRUGINGSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: ARRUGINGSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: ARRUGINGSA FOR DIAGNOSTICS AND THERAPEUTICS
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT APPLICATION NUMBER: US 60/074,788
PRIOR PILING DATE: 1998-02-18
PRIOR PILING DATE: 1998-07-18
PRIOR PILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
SEQ ID NO 20646
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          273
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          426
